

Deutsche Börse Group's T7 - Derivatives Markets

T7 Trader, Admin and Clearer GUI

What's New

Release 7.0

Version 7.0_02

Date 02. Nov 2018

1 What's New in T7 Release 7.0

1.1 What's New at a Glance

1.1.1 Eurex Improve / CLIP

Order Entry view supports now execution of customer flow at best price levels in the central order book of Eurex markets. Select Restriction *CLIP* in Order Entry to start filling an Eurex Improve trading indication. Market view, Order and Trade views enhanced to support display of CLIP specific data.

Contract	Type	Ratio	O/C	Act	TotQty	Limit	Res	ArrID	TrdInd	Counterparty	MinClipQty	MaxClipQty	PublishSide	PublishPrice	PublishQuantity

1.1.2 Enhancements to Risk functionality

New view **Pre-Trade Risk limits** allows trading members to set and review Pre-trade risk limits for on-book and off-book. Bulk import of limits is supported as well. Those limits can only be set for products which are defined to be eligible.

Existing *Pre-Trade Risk limits* view has been renamed to **Book Order Count Limit** view to avoid confusion with the new view.

Market Maker Protection functionality extended to allow setting the parameters on both the BU level and at a session level per product. Setting MMP parameters per instrument type is not supported anymore.
