Page 32

1 Introduction

This document describes all the reports distributed for Eurex derivatives trading & derivatives clearing and European Energy Exchange (EEX) derivatives.

This document is intended for the staff dealing with reports. The purpose of the Eurex Clearing XML Reports – Reference Manual is

- to explain the content of the reports, and
- · to describe each report in detail.

Additional information related to generic text reports is included.

Please note that all Eurex derivatives trading, derivatives clearing and EEX derivatives reports are provided exclusively via the Common Report Engine.

With the introduction of C7 release 3.0, new C7 reports are distributed to Eurex members in accordance with the functionalities covered by the latest software version used.

For areas which are not yet covered by C7, the reports are generated in Eurex Classic as before.

EEX members continue to obtain reports from Eurex Classic. This document describes both kinds of reports.

Version V 7.0.0

Page 33

2 XML Reports Concepts used by Eurex

In this chapter the main concepts of the XML Reports offered by Eurex are explained.

2.1 Eurex Terminology

Throughout the Eurex XML Reports documentation, specific terms are used to refer to certain objects known to the Eurex system. To avoid misunderstandings the most important terms are described in this paragraph.

The term **product** refers to a set of options or futures contracts, all based on the same specific underlying security or other value (an underlying), that have been admitted to trading at the Eurex Exchanges (e.g., futures on the German Stock Index DAX, options on the registered stock of BMW). A product is identified by its product Id, e.g. "FGBL".

The term **underlying** is, in each case, the point of reference for the product (e.g., the underlying of the product FDAX is the German Stock Index DAX; the underlying of the product options on the registered stock of BMW is the registered stock of BMW).

A **futures contract** is uniquely defined with the fields product Id, contract expiration month and contract expiration year. An **option contract** is uniquely defined with the fields product Id, contract class code, contract expiration month, contract expiration year, strike price (or contract exercise price) and version number.

A **futures combination** is uniquely defined by its two future contract legs. Both legs share the same product.

A **strategy** is uniquely defined by its strategy type and up to four legs, each determined by a buy/ sell indicator, an option or futures contract specification, a strategy leg underlying price and a strategy leg volume.

A **flexible option** is uniquely defined by its product Id, contract class code, contract expiration date, strike price, version number, exercise style (european/american option) and settlement type (cash/physical).

A **flexible future** is uniquely defined by its product Id, contract expiration date and settlement type.

2.2 XML Report Layout

The XML Report layout consists of the basic elements structures, structure members and data types.

2.2.1 Structures

Structures are ordered collections of structure members.

They may contain fields and/or substructures as members, forming a structure tree. On top level (the root of each structure tree) there is the main report structure.

Most structures are defined as a part of one report. Structures used in several reports are called common structures.

Version V 7.0.0
22.07.2020
Page 34

Naming conventions for structures are:

reportName Main structure of a report reportName***Grp Sub structure of a report

reportName***KeyGrp Sub structure of a report which contains key fields

2.2.2 Structure Members

A structure member is either a field or another (sub-)structure. A structure member may be enriched by attributes to define report specific properties.

Fields are defined by their data type and share the name of their data type. Substructures may occur once or multiple times in a structure. The name of a substructure member is equal to the substructure name.

Each field and structure occurs at a specific place in the sequence of fields in the substructure tree of a report. Substructure can represent an exception, in the sense that they can occur multiple times.

Structure members may be mandatory or optional. Optional members may be omitted in the XML report.

2.2.3 Data Types

Data Types describe context-independent properties of a field, like its format and length. The format of a data type may be alphanumeric, numeric or signed numeric.

These properties are independent of the report where a field with this data type occurs. Since a field in a structure must have the same name as its data type, this implies that two fields with the same name always have the same data type.

2.2.4 Rules for creating the XML Structure

2.2.4.1 Main Report Structure

2.2.4.2 Substructures

</reportName>

</reportNameGrp>

Substructures are written as follows:

Eurex Clearing XML Reports – Reference Manual	Version V 7.0.0
	22.07.2020
XML Reports Concepts used by Eurex	Page 35

The structure members occur in the sequence as they are defined in the XML Report layout. Optional members may be omitted, if they contain no data.

In case of a multiple occurrence, the <structureName> element is repeated.

2.2.4.3 Field Values

</structureName>

Field values are written as

<fieldName>fieldValue</fieldName>

or, if no value is given for a mandatory field,

<fieldName/>

Optional fields are omitted if no value is given.

Alphanumeric field values are written to the XML Report with their complete field length.

Examples:

Numeric values with precision 0 are written in the format DD...D without leading zeroes (D denotes a digit 0, 1, ..., 9).

Example:

<sumTrnLngQty>558</sumTrnLngQty>

Numeric values with precision > 0 are written in the format DD...D.D., where the number of trailing digits is given by the precision.

Example:

<valPerTick>1.0000</valPerTick>

Signed numeric values are prefixed with a plus ('+') or minus ('--') sign.

Example:

<sumPrmVmarAmnt>-88880.00</sumPrmVmarAmnt>

2.2.5 Rules for Text Reports

The text reports created from the XML reports serve to display the contained data in a human readable format. Only the XML reports are suitable for automatic processing.

Eurex strongly advises against any form of text report processing, e.g. by parsing data from the text report content.

The following sections describe some generic rules how the layout of the text reports is determined from the XML report structure.

Version V 7.0.0
22.07.2020
Page 36

2.2.5.1 Generic Text Report Structure

The creation of generic text reports uses the following rules:

- The global layout of a generic text report is determined by the XML report data structure.
- Data rows are shown in the sequence defined in the XML report.
- Fields are shown in the sequence defined in the XML report.
- Column widths are determined by the maximum of heading length and data field length.
- Column headings are written into one line.
- Spacing between columns is always one.
- Underlines (indicating the column width) are provided for the field width of the first row.
- Lines are wrapped, if they are longer than 132 characters.
- Starting position for wrapped lines is one character indented from second field on the first line.

2.2.5.2 Field Values

The display of field values adheres to the following rules:

- The field value display is determined by the field specific format and the specific report context.
- The field column heading is determined by the field, dependent of the report context.
- Alphanumeric values are displayed left justified with the original value retrieved from the XML Report data. Depending on the specific report, values from the XML reports are mapped to some decode in the text report.
- Numeric values are displayed right justified according to their field specific display format with the original value retrieved from the XML Report data.

The specific rules for numeric values are

- The decimal separator is a point.
- No leading zeroes are displayed.
- All decimal digits given by the field precision are displayed (e.g. 1.200 for precision 3).
- "Minus signs" are written as prefix or suffix of the number, or as long/short indicator.
- It is possible to have a thousand separator for the text format (e.g. 12,345,678.90).

2.3 Common Report Engine

The Common Report Engine is the exclusive source for report files and theoretical price files for Eurex trading participants, Eurex clearing members and participants of the EEX Derivatives Market. It is an FTP solution based on an SFTP report server that allows participants to easily retrieve all of their reports from a single source.

Eurex	
Eurex Clearing XML Reports – Reference Manual	Version V 7.0.0
	22.07.2020
XML Reports Concepts used by Eurex	Page 37

All transactional and participant specific reports are available in a participant-specific directory structure. Non-transactional and non-participant specific reports and files are available in the public area. Such

reports are tagged as CRE Area: public in this manual.

The Common Report Engine can be accessed via leased line connectivity or via the internet.

In order to access the Common Report Engine, a specific user account for the Common Reporting Engine must be setup and a public key has to be uploaded in the Member Section of the Eurex website (www.eurexchange.com).

Please note that reports will only be generated for participants if an activated Common Report Engine user account exists.

The participant is responsible for the user account setup on the Common Report Engine for all markets applicable.

Detailed information to the Common Report Engine is provided in the Common Report Engine User Guide on the Eurex Homepage:

www.eurexclearing.com > Technology > Eurex Clearing's C7 > System documentation > Release [Release number] > Eurex Reports and on www.eurexchange.com with a similar path for Eurex Exchange's T7

3 Introduction to XML Reports

3.1 XML Report Characteristics

The XML report descriptions contain the following information:

Description A textual description of the functional contents of the report.

Frequency The frequency or the specific events at which the report is created.

Availability The group of members (e.g. clearing members, trading members) to

which the report is available. Please refer to section 3.2 for a detailed

description of report availability.

XML Report Structure A description of the composition of groups and tags that are used with

the XML report. Underlined items represent groups; the contained tags are identified by indent level. Additional information is provided on the cardinality of subgroups. Please refer to section 3.3 for a description of

cardinalities.

M/O A usage code to indicate whether a report tag is mandatory or optional.

Please refer to section 3.4 for a detailed description.

Text Report Heading The heading of each tag when printed in a text report. The heading

depends on the tag, but may be defined different in a specific report context. Tags bound together in a group may be concatenated under

one heading.

If the text report heading is marked "(XML only)", the tag content is not

written into the text report.

Text Report Structure A generic description of the layout that is used with the text report.

Each text report field is printed once with his heading and the generic

text format which is used to display the value.

Alphanumeric values are filled up with *X*, according to the field length. Numeric values are filled up with 9, together with thousand separators,

decimal points and signs if applicable.

Please remark that the layout of text reports may be subject to

change without further notice.

Introduction to XML Reports	Page 39

3.2 Report Availability

Reports are created and available to different groups of members.

Available for	Description
clearing and trading members	Each trading member receives a report containing its individual data.
	Each clearing member receives a report containing his individual data and the data of its associated trading members.
trading members only	Each trading member receives a report containing its individual data.
clearing members only	Each clearing member receives a report containing his individual data and the data of its associated trading members.
all members	Each member receives the report containing identical data. Please note that such reports do not have a member specific header.

Table 3.1 - Report Availability

3.3 Structure Cardinality

Any substructure may be contained zero, one or multiple times in a structure.

The XML report descriptions contains a cardinality information for each structure in the form structure

or

structure, repeated cardinality times:

Cardinality	Description			
(none)	Substructure occurs exactly one time			
т	Substructure occurs exactly <i>m</i> times			
m n	Substructure occurs minimal <i>m</i> , maximal <i>n</i> times			
m variable	Substructure occurs <i>m</i> to any number times			

Table 3.2 - Structure Cardinality Descriptors

Eurex	
Eurex Clearing XML Reports – Reference Manual	Version V 7.0.0
	22.07.2020
Introduction to XML Reports	Page 40

3.4 Usage Code

The XML report descriptions contain usage codes for each tag. These codes provide information on whether a tag is mandatory or optional. *Table 3.3* below lists all applicable usage codes and provides a description.

Usage Code	Explicit	Field Usage Description
m	mandatory	Tag occurs always (but may contain an empty string)
0	optional	Tag may be omitted

Table 3.3 - Field Usage Codes

4.1 CA Capital Adjustment

4.1.1 CA051 Capital Adjustment Series

Description This report contains all changes of contract specifications for existing

regular and LEPO series and contract specifications of new series that are added following a capital adjustment. In the case of a capital adjustment, the system generates new contract versions. Adjusted series have the existing version number incremented by 1. Newly created series contracts have the version number 0. The displayed series information is sorted by underlying and by type of capital adjustment. The AdjustmentType value is 594 for Capital Adjustment.

The report is available for EUREX/ECAG Members.

Frequency Capital adjustment.

Availability This report is available for all members.

4.1.2 CA752 Capital Adjustment Positions Overview

Description This C7 report contains all changes of contract specifications for

existing regular and LEPO series as well as contract specifications of new series that are added after capital adjustments. In the case of a capital adjustment, the system generates new contract versions. Adjusted series have their existing version number incremented by 1. Newly created series contracts have the version number 0. The displayed series information is sorted by underlying and by type of

capital adjustment.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members.

4.2.2 CB012 Account Statement

Description This C7 report lists the opening positions in the option series and

futures for flexible and standard contracts, the daily position

movements at a transaction level and the up to date positions in the individual accounts of the exchange member. For each transaction, the report contains the variation margin payments for futures contracts, the premiums on options calculated in the "traditional" way and the

variation margins for "futures-style" settled options.

The report displays detailed position data according to currency, account and product. Premiums and variation margins are added per series of an option class (Call/Put) or a futures contract. Totals are calculated per product and account in product currency.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

4.2.5 CB167 Late Closing Fees

Description

This report displays the Late Closing Fees incl. the respective details to the zero cost quantity. The Late Closing Fee is charged when position closing adjustments are entered after the defined time limit and the quantity of the entered position closing adjustment exceeds the defined zero cost quantity.

This report is organized by member, account and contract. It lists all member positions for products for which a late closing fee in the corresponding currency is charged. For every contract, fee relevant transactions entered before and after the time limit are shown separately. The time limit indicates the time from which position closings for positions resulting from the previous business day are chargeable. The field RESULT ZERO COST QTY shows the zero cost quantity for the next business day. If the amount is negative, the fee is calculated and the zero cost quantity is zero.

The report is available for EUREX/ECAG Members.

Frequency

Daily.

Availability

This report is available for clearing and trading members.

4.2.25 CB702 Cash Settled Contracts Overview

Description This C7 report shows the cash settled index options on the exercise /

assignment day, detailing the profits and losses produced by these

contracts.

The cash settlement amount of the net position is calculated by evaluating the strike prices for exercised options against the final settlement price. The individual results are added for each currency, per contract,

product and account.

Other cash settled products are no longer included.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Daily.

4.2.26 CB715 Average Pricing

Description This C7 report shows details about Average Pricing or De-Merge trans-

actions. Average Pricing is the merge of multiple transactions from the current day, with the same instrument, same account and the same buy/sell side. For each Average Pricing transaction the report shows all related transactions as well as the resulting volume weighted average

price.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members.

Frequency Daily.

Availability This report is available for clearing and trading members.

4.2.27 CB730 Position Transfer Summary

Description This C7 report lists all of the position transfers of a member. The report

lists the details of partial position transfers transactions for members. Transfers shown are partial position transfers, complete position transfers, partial position transfers with or without cash amount and

position transfer during a clearer change.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency Daily.

Availability This report is available for clearing and trading members.

4.2.28 CB731 Settling Futures Positions Overview

Description This C7 report contains the open long and short positions of Bond and

FX/Stock futures contracts which expire in the current month. This report is produced daily during the delivery month until the day of notifi-

cation.

It contains the open long and short positions. It provides the totals per

exchange and clearing member.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members.

Frequency Ten days before settlement date (warning period).

Availability This report is available for clearing and trading members.

4.2.30 CB750 Give-Up Trades Overview

Description

This C7 report shows all give-up trades in chronological order. It lists all predesignated, designated and rejected give-up trades. Give-up trades accepted by the recipient as take-ups are also listed. This report shows detailed information on the approval workflow for give-up trades. The trades given up are listed in order by receiving member, currency, account, product and series. The following totals are calculated:

- Sum of all take-up trades
- Sum of all pending trades at the end of the day
- Sum of all deleted give-up trades.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency

Daily.

Availability

This report is available for clearing and trading members.

4.2.31 **CB751 Take-Up Trades Overview**

Description This C7 report shows all take-up trades in chronological order. It lists

> all predesignated, designated and rejected take-up trades. This report shows detailed information on the approval workflow for give-up trades. The trades given up are listed in order by receiving member, currency, account, product and series. The following totals are calcu-

lated:

- Sum of all take-up trades

- Sum of all pending trades at the end of the day

- Sum of all deleted give-up trades.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency Daily.

Availability This report is available for clearing and trading members.

4.3.5 **CD020 Collateral Movement/Coverage**

Description This report lists the transactions showing the movements of the

different collateral accounts. Changes of coverage use are also

displayed. Only for fully segregated DC Market Participants this report will contain data. For omnibus segregated DC Market Participants as well as not segregated DC Market Participants this report will always

be empty.

The field transaction ID (trnIdNo2) has a length of 15 instead of 9 as

expected in this report.

The report is available for EUREX/ECAG Members and EEX/ECC

SecurityId

m

Members.

The report will be available in XML and CSV formats only.

Frequency Daily.

4.3.6 CD030 Security Expiration

Description This report lists the expiration dates of securities. It shows which

securities, deposited as cover, are due in the next four weeks and therefore lapse as collateral. The securities are ordered by due date

and due date is totaled.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

The report will be available in XML and CSV formats only.

Frequency Monthly.

4.3.8 CD033 Collateral Composition

Description This report shows the difference between the evaluated and limited

collateral security value and the margin requirement. The collateral values are shown per security group and currency. The values are converted to the clearing member currency and added up per security

group ("B" for bonds, "S" for stocks, "C" for cash).

All collateral values are converted into the corresponding clearing member currency and added up per security group. These totals are then possibly cut by the limit factors defined by Eurex, added up and compared against the total margin requirement of the clearing member.

Only for fully segregated DC Market Participants this report will contain data. For omnibus segregated DC Market Participants as well as not segregated DC Market Participants this report will always be empty.

(XML only)

4.3.10 CD042 Daily Settlement Statement

Description This report describes the daily settlements. It lists the necessary

margin requirements, pledged cash and security balances and the cover credits and debits. The "over/under" cover values by currency are converted into the member's clearing currency and summed to

calculate the net margin profit or deficit.

Only for fully segregated DC Market Participants this report will contain data. For omnibus segregated DC Market Participants as well as not segregated DC Market Participants this report will always be empty.

Entries for currencies with empty (zero) values will be omitted. However, the entry in the clearing currency will be available. i.e: If all the following fields are with zero value for a non-clearing currency (recA_secuTotBalAmnt), (recA_guarTotBalAmnt), (recA_cshCollAmnt), (recA_mgnReqrAmnt), the entire row will be omitted.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency Daily.

Availability This report is available for clearing and trading members.

4.3.11 **CD044 Daily Client Collateral Allocation**

Description This end-of-day report shows the allocation between direct client's

> (Collateral Direct Clients) and indirect client's collateral (Collateral Indirect Clients) for each Pool ID of a Clearing Member. The value of the collateral will be displayed for each client account and aggregated for all direct clients and all indirect clients on a collateral pool level. The value of the allocated collateral is denominated in the collateral pool currency. If the collateral pool holds collateral for clients in excess of the total margin requirement, this will be reported separately as collateral surplus. In case more than one collateral pool is assigned to a clearing member then the results are consolidated in a single report.

> This report is available for clearing and DCs with member ID. For fully segregated DCs with Member ID this report will contain data. For omnibus segregated DCs with Member ID this report will always be

empty.

Frequency Daily.

Availability This report is available for clearing and trading members.

4.3.12 CD045 LSOC Settlement Statement

Description The report displays margin requirements and LSOC specific collateral

values. The relevant collateral values are Legally Segregated Values (LSVs), FCM Buffer, Unallocated Excess (UE) and Assumed Allocation (AA). UE is displayed for information only. The LSOC Net Margin Surplus value ("IsocNetMgnSrpl") corresponds to the margin call issued to the FCM master pool in case it is negative. In case it is positive and the calculation model variable ("calcModel") is "without-Excess", it corresponds to the unused FCM Buffer ("fcmBuffer") of FCM master pool. In case it is positive and the calculation model variable ("calcModel") is "withExcess", it corresponds to the unused AA of FCM master pool ("assAlloc"). The Used FCM Buffer (usedFcm-Buffer) value displays the amount of the FCM Buffer that has been used to cover margin requirements. The report assumes a master pool to sub pool relation with one FCM master pool (i.e. type "LSOCMaster") that is assigned to one or more FCM Client sub pools

(i.e. type "LSOCSub").

The report is available for EUREX/ECAG Members.

Frequency Daily.

Availability This report is available for clearing members only.

4.3.13 CD080 Monthly Collateral Movement

Description This report lists the monthly transactions in the different security

deposit accounts. It provides information on changes to the security deposits. Only for fully segregated DC Market Participants this report will contain data. For omnibus segregated DC Market Participants as well as not segregated DC Market Participants this report will always

be empty.

The field transaction ID (trnIdNo2) has a length of 15 instead of 9 as

expected in this report.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

The report will be available in XML and CSV formats only.

Frequency Monthly.

Availability This report is available for clearing and trading members.

4.3.15 CD230 Monthly Interest Report

Description

This report shows the interest earned on cash collateral held with Eurex Clearing and the respective cash handling fee, summed up for each calendar day, and aggregated for the month.

The report is generated per pool ID ('poolID'), type of money ('typeOfMoney') and currency ('currTypCod') once the interest is calculated and posted.

The report shows the ending balances of the interest earned on cash and the cash handling fee ('intErnCshBalAmnt', 'feeCshBalAmnt'), the applied interest and fee rates ('intErnRatPct', 'feeRatPct'), the calculated values of the interest and fee for each calendar day ('dlyInErnAmnt', 'dlyFeeAmnt'), their sum ('dlyIntAmnt'), and an overall value for the month ('sumCurrDlyIntAmnt'). It also shows the accrued net interest to date ('aggAmntToDate'). In addition, the report shows the details of the effective transactions at CM level ('trnCurrTypCod', 'trnValDat', 'trnAmount'). The outcome can be either i) credit of interest earned after deduction of the cash handling fee (if 'trnAmount' is positive) or ii) a payment to Eurex Clearing (if 'trnAmount' is negative). The CM's version of the report contains all pools of the CM and its DC Market Participants as well as all pools of their ISA Direct members. The ISA Direct members will receive the report displaying their pools. The data at DC Market Participant level is provided only if they are fully segregated. For other clients the report will be empty.

The report is available for ECAG Members.

4.3.16 CD231 Daily Preliminary Interest Report

Description

This preliminary report shows the interest earned on cash collateral held with Eurex Clearing and the respective cash handling fee, summed up for each calendar day, and aggregated to date.

The report is generated per pool ID ('poolID'), type of money ('typeOfMoney') and currency ('currTypCod') and is provided every business day.

The report shows the ending balances of the interest earned on cash and the cash handling fee ('intErnCshBalAmnt', 'feeCshBalAmnt'), the applied interest and fee rates ('intErnRatPct', 'feeRatPct'), the calculated values of the interest and fee for each calendar day ('dlyInErnAmnt', 'dlyFeeAmnt'), their sum ('dlyIntAmnt'), and the accrued value for the current month ('sumCurrDlyIntAmnt'). It also shows the accrued net interest to date ('aggAmntToDate'). In addition, the report shows the preliminary details of the expected transactions at CM level ('trnCurrTypCod', 'trnAmount'). The outcome can be either i) credit of interest earned after deduction of the cash handling fee (if 'trnAmount' is positive) or ii) a payment to Eurex Clearing (if 'trnAmount' is negative). The CM's version of the report contains all pools of the CM and its DC Market Participants as well as all pools of their ISA Direct members. The ISA Direct members will receive the report displaying their pools. The data at DC Market Participant level is provided only if they are fully segregated. For other clients the report will be empty. The report is available for ECAG Clearing Members.

4.4 **CE Clearing Exercise and Delivery**

4.4.1 **CE038 Deliverable Bonds**

Description This report details the calculation of conversion factors and invoice

> amounts for deliverable bonds. Clearing members can select the bonds shown in this report for delivery. It contains information on the deliverable bonds of all traded bond futures contracts. It presents the data for the calculation of conversion factor and invoice amount. Settlement price and invoice amount are only displayed for deliverable

> securities expiring this month. This report is produced when a contract

Contract

m

expires and another contract month is listed.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency Daily.

Availability This report is available for all members.

CRE Area Public.

4.4.4 **CE055 FX Settlement Limit Report**

Description This report shows the projected settlement amounts from FX futures

> and options positions held by Clearing Member, resulting from FX futures notification/allocation and from FX options exercise/ assignment, and checks these against pre-determined settlement amount limits. The projected settlement amounts are calculated and reported daily only for the next expiry month, i.e. the front month (futures and options have the same expiry date). Then the projected settlement amounts are held against the settlement limits. Only short settlement amounts i.e. settlement amounts that the Clearing Member

has to pay are considered.

The report is available for EUREX/ECAG Members and EEX/ECC

Product Id

Members.

Frequency Daily.

4.4.5 **CE056 End of Day CLS Settlement Report**

Description This Report displays per Member, currency and instruction Id, the

> transactions that are due to settle over CLS on T+1 as well as the respective instruction amount. These transactions have settlement date T+1 and have been processed in the Night Time FX Processing

(netting run is filled with NTPFX).

Moreover, this report shows Immediate FX Instructions (netting run is filled with IFXI) which have already been settled on T. These transac-

FX instruction Id

0

tions have settlement date T, the instruction id is filled.

Frequency Daily.

instrld

Availability This report is available for clearing members only.

4.4.6 CE710 Contract Expiration

Description This C7 report provides information related to option series with a time

till expiry of not more than ten trading days. The report contains:

- The In- or Out-of-the-money value per unit
- Positions, which are held in this series at the end of the day
- The amount reflecting how far a long position of a series is in-themoney.

The report contains detailed information about expiring option series per member, currency and account. The total amounts of the long and short positions as well as the in-the-money amount are listed. On the expiration day the final position after automatic exercises but before contract expiration is shown.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency Two weeks before expiration date through the expiration date..

Availability This report is available for clearing and trading members.

4.4.7 CE735 Expired Series Information

Description This C7 report provides details on expired series and positions that are

in these series.

It is arranged by clearing member, exchange member, currency, account type, product type and options class. It contains details about expired series and totals for the position balance by class, by Eurex

product and by exchange member.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members and EEX/ECC

Members.

Frequency Expiration date of options.

4.4.9 **CE770 Exercise And Assign Overview**

Description This C7 report lists exercised long positions and assigned short

> positions of stock options contracts. It contains information about the daily exercises and assignments in each series, arranged by clearing member, currency, product type, exchange member and account type.

There is also a list of delivery instructions resulting from the exercise

process. It shows EUREX-CSD as the contracting party.

The data is sorted by exchange member and underlying. Cash settlement only contains an amount when the payment is made in

cash.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members.

Frequency Daily.

CE775 Notification/Allocation Information 4.4.11

Description This C7 report provides information on deliveries resulting from notifi-

cation or allocation notice (per reference number). The contracting party is listed for internal deliveries (either a DC Market Participant or a

clearing member proprietary account).

The contracting party is not displayed on the report for external deliveries that are carried out through the CSD. As a complementary report to the delivery list, it supports the CSD concerning the release of deliv-

eries and serves as a basis for internal deliveries to the CSD.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EUREX/ECAG Members.

Expiration date of physically settled futures. Frequency

Availability This report is available for clearing members only.

4.5 CI Intraday Reports

4.5.1 Cl012 Account Statement

Description This C7 report lists the opening positions in the option series and

futures for flexible and standard contracts, the daily position movements at a transaction level and the up to date positions in the individual accounts of the exchange member. For each transaction, the

report contains the variation margin payments for futures contracts, the premiums on options calculated in the "traditional" way and the

variation margins for "futures-style" settled options.

The report displays detailed position data according to currency, account and product. Premiums and variation margins are added per series of an option class (Call/Put) or a futures contract. Totals are

ExMbr

m

calculated per product and account in product currency.

The report is available in xml- and csv-format.

In addition the report contains information on flexible contracts.

The report is available for EEX/ECC Members.

Frequency Intraday.

4.5.3 Cl056 Preliminary CLS Settlement Report

Description This Report displays per Member and currency, the transactions that

are due to settle over CLS on T+1 as well as aggregated amounts per currency. These transactions have settlement date T+1 and have been processed in the Preliminary FX run (netting run is filled with PREFX). Please note that for these transactions no instruction is created yet,

therefore the instruction id is not sent.

Moreover, this report shows Immediate FX Instructions (netting run is filled with IFXI) which have already been settled on T. These transac-

tions have settlement date T, the instruction id is filled.

Frequency Daily.

Availability This report is available for clearing members only.

Introduction to Report Tag Descriptions	Page 263

5 Introduction to Report Tag Descriptions

This is a description of the tags of XML reports. An overview of the tag descriptions is given first.

5.1 Tag Characteristics

The characteristics of each tag are detailed giving the following information.

Description A short description of the tag's functional meaning.

Format Defines the format and size of the tag. *Table 5.1* describes common

formats for tags.

Format	Description	Example
alphanumeric n	Text of maximal length n, stored as string.	A tag with format "alphanumeric 6" may contain the values "TRD001" or "ABC" or "".
numeric n [, m]	Number with n significant digits and, if given, precision m. The number is stored as a string containing the decimal point if applicable.	A tag with format "numeric 5, 2" might contain the values "314.15" or "3.14" or "0.00".
numeric signed n [, m]	Signed number with n significant digits and, if given, precision m. The number is stored as a string prefixed with the "+" or "-" sign and containing the decimal point if applicable.	A tag with format "numeric signed 5, 2" may contain the values "+314.15" or "+3.14" or "314.15" or "+0.00".
DateFormat	Date, stored as a string in the format CCYY-MM-DD	A DateFormat tag may contain the value "2005-03-28".
TimeFormat	Time, stored as a string in the format hh:mm:ss.cc	A TimeFormat tag may contain the value "23:59:59.99"
TimeFormat18	Time, stored as a string in the format hh:mm:ss.cc.ccc.ccc	A TimeFormat tag may contain the value "23:59:59.99.999.999"

Table 5.1 - Tag Formats

Valid Values	Some tags have a predefined limited set of values they may contain.
Decodes	The decoded literals belonging to the valid values constants as used in the generic text reports.
Descriptions	A short description of the value's functional meaning.

6 XML Report Tag Descriptions

The following sections provide specific information on XML Report tags.

6.1 abdnQty

Description This field contains abandoned quantity, which is the number of

contracts excluded from automatic exercise for the repective option

series.

Format numeric 9

Where used: CE710 Contract Expiration

6.2 abdnTrnQty

Description This field contains the abandoned transaction quantity, which is the

number of contracts excluded from automatic exercise.

Format numeric signed 9

Where used: CE780 Exercise Abandon Daily Maintenance Overview

6.3 abortAmnt

Description This field contains aborted amount.

Format numeric signed 14, 2

Where used: CE051 FX Transactions & Instructions

6.4 accntName

Description This field indicates the name of an account or account group on which

the privilege is applicable.
