(2) The premium payment is not made through a one-time payment after the purchase of the option; instead it is part of the daily settlement process during the duration of the option position based on a mark-to-market valuation of the position on each Exchange day. The valuation is made on the day on which the transaction is entered into on the basis of the difference between the option price and the daily settlement price, and thereafter on the basis of the difference between the daily settlement prices of the current Exchange day and the preceding Exchange day. The daily settlement may also result in an interim debit of the writer.

Upon exercise and assignment of the option, as well as upon its expiration, a final premium payment shall be made in an amount equivalent to the daily settlement price of the option contract on the exercise day or the expiration day, as the case may be.
