

Attribute	Attribute Definition	Example	Remark
Additional Payments	Fees or other payments defined at contract conclusion. The Fees have to be in trade currency. There is no restriction on the number of fees/ additional payments which can be added to a trade.	EUR 100	T+1 ≤ Fee Date ≤ Termination Date where "T" stands for cleared date
Bond Coupon Rate	Bond Coupon Rate in % up to 5dp	3.19834%	User defined MarketWire field
Calculation Method (SCIS)	Used in inflation asset swaps to calculate the inflation coupons and principal exchange.	Ratio	Ratio=CPIt /CPI0 Inflation Leg Coupon Payment = N *(CPIt /CPI0)*R2* DCF
Calculation Period Date Business Day Convention	Adjustment convention for the calculation period dates of a contract if calculation period dates fall on a holiday.	Following	Possible values: None (no adjustments to any Business Day Convention) Following Mod Following Preceding
Calculation Period Date Holiday Calendar	Holiday calendars used for the Calculation Period Date Holiday Calendar.	EUTA	
Calculation Style (SCIS)	Determines the style of how the inflation index calculates the coupon payment (e.g. YearOnYear, ZeroCoupon).	Zero Coupon	For Inflation linked products, Zero Coupon means the base inflation index is fixed throughout the life of the swap. The reference month is calculated by the number of months in the lag period, minus the effective date of the swap
Compounding Method	Method used for compounding of interest at the floating leg if payment period is a multiple of the index tenor.	Flat	Straight: Interest on interest is paid both on floating rate and spread amounts. Flat: Interest on interest is paid on floating rate amounts, spread is paid on initial notional. Refer to the International Swaps and Derivatives Association (ISDA) for further description of compounding methods. Compounding is only applicable to the floating leg
Day Count Convention	Defines the calculation method for interest accrual in a period.	ACT/360	For a definition of the different Day Count Conventions please refer to the Clearing Conditions of Eurex Clearing AG.
Final Exchange (SCIS)	To be specified only for inflation products that embed a redemption payment	✓	Inflation Leg Final Payment = Nin ² *CPIt / CPI0
Fixed Leg Maximum Period Length Long First / Long Last	The maximum length of the long broken period on the fixed leg.	1Y+1M	
Fixed Rate	Fixed leg rate. The value is allowed to have up to 10 decimal points, i.e. the precision is 0.000000001; 0.00000001%; or 0.000001 basis points.	0.01	For trades submitted with a Fixed Rate greater than 10 decimal points, these trades will be rounded down to 10 decimal points.
Fixing Date Calendar	Holiday calendars used for the fixing of floating rates.	EUTA	
Fixing Date Offset	The reset of the Floating Index occurs with the frequency of the tenor length on or before the reset date (a negative value implies that a fixing prior to the reset date will be taken).	-2 business days	
Fixing Date Relative to Floating Index	Fixing of floating rates is done at the beginning or end of the period. The name of the Floating Rate Index. It is unique for each currency and has to match exactly in order to be eligible for clearing.	Period Begin USD-LIBOR-BBA	
Floating Index Tenor	Possible index tenors of the Floating Index.	3M	
Floating Leg Index Spread	A fixed spread on the floating rate. The value is allowed to have up to 10 decimal points, i.e. the precision is 0.000000001; 0.00000001%; or 0.000001 basis points. Simple spread means that the rate is not part of compounding i.e. the floating rate is derived by compounding the fixings for the period and the spread is added afterwards on top.	0.01	For trades submitted with a Fixed Rate greater than 10 decimal points, these trades will be rounded down to 10 decimal points.
Floating Leg Maximum Period Length Long First / Long Last	The maximum length of the long broken period on the floating leg.	7M	
Floating Rate	Both positive and negative spreads are permitted unless stated otherwise		
Forward Starting	A swap can have its start date after today's date. A forward starting swap has to adhere to maximum maturity rules.	✓	Adjusted start dates are permissible for Forward Starting swaps
Index Level Interpolation	Specifies how the inflation index level of inflation swaps is determined.	start month value	
Inflation Leg Reference Rate	For Zero Coupon Inflation Swaps the underlying reference rate for the calculation of the payments on the inflation leg.	HICPXT	Supported indexes in EUR: HICPXT, FRCPix Supported index in GBP: UK RPI
Initial Index Level	First pre-defined index level of a Zero Coupon Inflation Swap.	100	
Initial Rate	First pre-defined floating leg rate.	0.01	
Leg combination	Possible combinations of fixed and floating legs.	Fixed/Floating	
Maturity Date Business Day Convention	Adjustment convention for the maturity date of an Interest Rate Derivative if the termination date falls on a holiday.	Following	
Maximum Maturity	Defines the maximal residual term of a swap in years or months to be eligible for clearing at Eurex Clearing AG. Maximum maturity is defined as the latest possible date on which the termination of a swap contract may occur. The maximum eligible termination date is calculated by adding the spot lag in business days and the maximum maturity to today's date and applying Modified Following Business Day Convention. Eurex Clearing accepts a backloaded trade with an initial residual term greater than the eligible maximum maturity but terminating before the maximum allowed termination date: e.g. a CHF swap with an initial tenor of 40 years will be cleared if the start date lies at least 10 years before today's date, so that the termination date will take place before the maximum eligible date.	51 years	For a maximum maturity of 51 years the logic is as follows: Termination Date(End Date)≤ current date + spot lag + 18,675 calendar days (~51 years + 2 months) + MODFOLLOWING with a standard spot lag, e.g. 2 business days for EUR, USD, CHF, JPY, and 0 for GBP.
Minimum Notional	The minimum notional eligible for clearing.	0.01	Minimal notional is CCY 0.01 unless stated otherwise
Minimum Period Length Short First / Short Last	The minimum length of the broken period.	1 business day	
Minimum Residual Term	Defines the minimum amount of time between today's date and the termination date of the contract. The termination date for a backloaded trade has to be not prior to today's date plus minimum residual term in order to be accepted for clearing at Eurex Clearing AG.	1 business day	
Minimum Term	Defines the minimum number of days for a Swap	28 calendar days	The required minimum term for a Zero Coupon Inflation Swap is 28 calendar days. For all other products, Minimum Term is the same as Minimum Residual Term
Payment Date Business Day Convention	Adjustment convention for the payment dates of a contract if payments fall on a holiday.	Following	
Payment Date Calendar	Holiday calendars used for the Payment Date Business Day Convention.	EUTA	
Payment Lag	Offset for payments.	0 business days	
Payment Period	Possible payment frequency of the leg. Any payment leg combination can have the listed payment frequencies on each leg. => A swap with a fixed leg with zero coupon payment and a floating leg with zero coupon payment would be eligible for clearing.	zero coupon	
Payment Relative to	Defines if the payment is made at the beginning or the end of the period.	Period End	
Roll Convention	The roll dates will be defined by the termination date (if the last period is of regular length) or by the period end date of the last regular period (in case a last stub applies). Alternatively period end dates can be end of month (EOM). IMM can be chosen if the reset dates should correspond to the 3rd Wednesday of the IMM-roll month.	EOM	
Start Date Business Day Convention	Adjustment convention for the effective date of an Interest Rate Derivative if the start date falls on a holiday.	Following	
Stub Period Index (Interpolation)	The index or index pair (interpolation) used for the stub rate.	1W	Linear interpolation may be used instead of a single tenor if the stub period does not correspond to a tenor.
Stub Type	A swap has a stub if the swap term is not a multiple of payment periods (fixed leg) or index tenor (floating leg). The additional period is called broken. The broken period is at start of the swap term if we define a front stub. The broken period is at the end if we define a back stub respectively. The period is considered to be short if the broken period is smaller than the payment periods (fixed leg) or reset frequency (floating leg). The stub is considered to be long if the broken period is larger than the payment periods (fixed leg) or reset frequency (floating leg).	Short First	The stub can be on one leg only or on both legs. If the payment period is not a multiple of payment/reset periods e.g. the swap term is nine months and the reset frequency is 6M on the floating leg the stub period will be 3M.
Variable Fixed Rate	Variable fixed rate on the fixed leg.	✓	
Variable Index Spread (positive or negative)	Variable spread on the floating leg.	✓	
Variable Notional	Variable notional for coupon calculation. Any eligible notional can be defined for calculation. Notional on floating leg and fixed leg can differ.	✓	
Variable Swap Schedule Dates	The dates on which the variable notional or variable fixed rate or variable index spread applies. The dates have to correspond to period start dates. The dates are subject to business day convention and holiday adjustments.	YYYY-DD-MM	

Note: business days, whenever mentioned, are defined by the applicable calendar.

Stub Specific											
Stub Type	Short First Short Last Long First Long Last										(i) Stub period is not allowed for Zero Coupon Swap and Compounding Swap legs. (ii) It is allowed to have one stub on one leg and no stub on the other leg. (iii) If each leg has a stub, both stubs must be of the same type, i.e. both First or both Last. You can't have First on one leg and Last on the other. (iv) If each leg has a stub, they can be different, e.g. Short First and Long First. (v) two stubs are allowed on one leg, with none on the other. (vi) two stubs on each leg are allowed i.e. four stubs in total. (vii) predetermined first fixings are not supported for OIS legs. (viii) three stubs are not allowed.
Minimum Period Length Short First / Short Last	1 business day	1 business day	1 business day	1 business day	2 business days	2 business days	1 business day	2 business days	2 business days	n/a	
Floating Leg Maximum Period Length Long First / Long Last	1Y + 1M	1Y + 1M	1Y + 1M	1Y + 1M	7M	7M	7M	7M	7M	n/a	
Stub Period Index (Interpolation)	N/A	N/A	1W 1M 3M 6M 1Y	1W 1M 3M 6M 1Y	N/A	1W 1M 3M 6M	1W 1M 2M 3M 6M	1W 2W 1M 3M 6M	1W 2W 1M 2M 3M 6M	Length of the stub period should be in between two neighbouring index tenors that can be selected for rate interpolation. Following cessation of publication of the 2M and 9M tenors of PRIBOR on 1 April 2025, 2M Stub Period Index (Interpolation) is no longer supported.	
Variable Swap Specific											
Variable Swap Schedule Dates	YYYY-MM-DD										The (adjusted) schedule dates for either notional, fixed rate or index spread schedule must match the (adjusted) accrual period start dates.
Variable Notional	✓										The notionals can be different for each accrual period and for each leg, but the notional must be greater than zero. It is allowed that the start and end dates of both swap legs are different. Variable Notional is not applicable in combination with Compounding (with the exception of 1d OIS compounding) or Zero Coupon payments on the same leg.
Variable Index Spread (positive or negative)	✓										Variable Index Spread is not eligible for Zero Coupon payments and payments made on Compounding basis.

Note: Eurex Clearing uses SwapsMonitor as data-source provider for the payment/reset-calendar (report CD299). SwapsMonitor as a data provider specialized on Holiday calendar data is the market standard for IRS. This means that all Eurex Clearing CMs will need to have a license to the SwapsMonitor financial calendar covering the S1 data window (no alternative available). Eurex Clearing distributes the calendar data to RCs, however a SwapsMonitor license for RCs is not required. The data may only be used to determine coupon dates for the EurexOTC IRS Clear cleared trades and to recalculate margin requirements.
